

Today in another you can pay monthly plan or whatever.

It is to pay individually, right? If you look here are the rates for the plans, the basic plans are 10 euros per month..

I have unlimited panoramic, well I don't know, plan, you don't have one, darling, and a month you have two tours a month with no panoramic limit, but two tours and the four-tour ones you can have all of them..

you want four or less panorama what.

be like forgiveness that.

If you have a tour of four or less panoramas, that does not count towards the limit, it can be all of them..

you want four or less panorama like that in fact it is there below look tures or at least four or less but no I think that.

I will have done three tours of four panoramic views just normally you start in a bunch especially if you want to give a good image to the client but that.

you can you can in the separate ones of another mount four yes I am using the pro okay that.

They are 24 dollars euros per month and they are ten weeks per month..

ten months there were times that.

have to.

pay a little more because.

I have made dofe but good of your little ones.

This one for example for shoe dor or that is to say that you put them at the level that.

This is Mai where are you here is Marco and your other one sorry you have taken another one no I think years ago I did some test or something but no I have not sold this routes for a long time.

goal for maps when that have errors in the stream view of that.

They should be for the same reason that.

sometimes it's good sometimes it's not and but that was the google platform no for no for no for no for no for no and these are the ones that.

I did look what what.

local this is the place that.

I did I don't know this I didn't have it many times I remember this is that.

150 euros who does not pay 150 euros I also many times attacked the pride of each one in narcissism narcissism we are not going to show your business clearly and that costs you zero more on top of that.

another and well little more I can tell you very good well if what you.

I said frame yes for example I think that.

Luis signed up for free and that's it.

They pay 10 euros for you if you do one a month then they pay 10 euros yes well that's it.

If you are just starting out, I think it is the best plan. For me, the best plan is the basic one, which I have. You have two tours and we will see..

move to do two tours but today if they come out at the end and I finish they are ten dollars it is not that much of course let's go I did with the pro what.

You are working well for me there are months that.

I do five others seven others zero but well but there I am that's what.

I am interested without end if I see there is not very good the soft form very good very good other also the soft form of go true includes panorra panorra is also from the same owner I do not know if.

Do you ever use it, Panorra is like a kind of social media to upload panoramic photos, Panorra, then Panorra and you can also take, for example, a photo anywhere, I don't know, in a.

in a square in some monument and you can upload it to Google from Panorra because.

You upload it to Panorra and then you put it like that.

take it and upload it to Google no no it is not the same I do not remember what his name is very very nice the owner of alín de go true alín is alín is a mayor le.

I send messages and the diocontres but immediately hey Oscar here with go true you can also do this first floor and second floor if this I can tell you in the like fair plaza to.

see that I never did this to me this is all the turpecho that is a good list and these are from go true missing those of

plaza or fair plaza let's see we're not going to see about the flats if there's no where to see but oh well because.

The Ferial Plaza does not appear to me because I do not know where it is..

I don't know where it is anymore, let's see this was page two, well I have several with plants, let's see where you are, it's that.

These are what.

I am not in the fairgrounds..

I don't know why I don't see it because I really don't.

I'm freaking out about this because.

They don't appear to me to see go true because.

I had already reached a lot of limits, it's not here, it's not here, it's not here, let's see where it is, it's very easy, the thing about the plants is super easy and I don't.

I know if these that.

appear here is that.

They are closed or they have made modifications or they have removed that from I have to.

ask him why.

It's been a long time since.

I didn't work around here that.

means that symbol here we are looking at plant one is this plant two is this plant three is this which.

Here I would have needed the artificial fairground, I imagine, so when you are going to edit it to the desktop moderator, I am not going to touch it over there, here you get all the parampics, I'm going to leave you.

to expand this because.

you see it is here they are all mixed not here they are all all plants mixed then I told you is I want level three out level two out level one out of the you work with level one when you finish.

of moderating level one when it is two or zero or one and you work on this how to add the plants when they are doing it? you don't do it when importing panoramas well not when.

import no but here when you tell it to upload panoramas and then you tell it to add a floor then you select the panoramas of that floor and you move them to that level you select other panoramas you move them to another level.

It's like that in that tab where you are not showing now it is here yes plant some senders plant three for example if I wanted to upload a plant four I would have to.

put upload panoramic upload panoramic and add another level is very simple today Oscar a question imagine what.

that which.

were four different stores that.

There are four different clients that.

They are in a building, how do you consider that you smell and there was and there in another building? Nothing is considered when you put the statement you put it in the building that.

It may happen that.

There is another turbidity too, they are not linked to it, it is not simply placed on top and that's it, it is placed through Google Business, not through the tag..

what.

The card is there, it's how it is put, no, you put the constalation as we have done with this one, let's see what.

we have done with this but it is not with the label.

from google video no no no no like something about if I go to google max and put the restaurant that.

just went up as you know.

It is that constancy of being a restaurant because.

It is associated with the Google Maillinia tab by the number six of the eyes, it is with the tab, no, you don't know, it is nothing, you do everything yourself, yes, yes, but but Marco is.

refers to that which.

Here in the background every Turk.

you create will associate a token and that.

can be one on top of the other yes or no but if you tell him that.

The card is clear, for example, here we look at, for example, that.

It was a new route, for example, if we don't let you put it for example,.

I don't know, for example, I'm going to look for one here that.

I have not done for example bich de la arena al cada de enarges okay well this is the bich of al cada de enarges then I come to your address is your antonómico ten file.

At each of enarges the only thing that is worth is.

I have to.

To do this is to copy this, I don't know if it is a copy link. I come to you and I tell you to look for the end of the CIF, okay, and you tell him to paste, look for the CIF and this is the CIF, it is active..

exclusive of that bich of that bich of that bich then if for example that store were one in a tower and there and there retienda riera you simply put it above because.

goes to the card in the bug of the negative card, that is,.

If you are visiting the tour of that office of that business even though.

you click on another site it doesn't go to another hard clear and you have to make a lot of business file of businesses that.

don't be lately not at the beginning yes at the beginning yes it was already a detail that.

I leave the client you claim the file it is true there are not two things look at registering this in google if it does not exist they have to.

register if you do not have a card you have to.

give it on google and it is like that if you can claim the little wall and after transferring ownership, right if that is another story that.

It is even more complex for the client if he is not the owner of the file because.

which.

you do is in the file is that.

For example, La Pedraera is the owner of this company when you click here because.

You want to get it back, here it tells you that.

the address that.

manages the stone, in this case it is the stone, okay, if I want to request access that.

It is what.

you friend here google sends him an email and says oscar is trying wants to be manager of the google file do you accept it if I did if my property passes that.

I said that.

No, there is no human way to recover it, but if he doesn't answer, if he doesn't answer either yes or no, in 15 days it becomes your property, but you can still do so after it is edited..

of that property and if you are an admin they can also leave you as an administrator, yes of course I am an administrator of several, look for example I put it here in google cancel hit the machine here I manage the.

companies and I manage these food medeavilla Juan's churrería that.

This is not verified because.

The client does not want to verify the Minoteca of this Tempranillo.

I manage this.

Oscarter, makes you two tokens in the same direction.

How? Two tokens in the same direction.

It can't be done.

It can't be done.

But the trick is in the truck address number.

Ok.

And once that.

You have made the card, you edit it and change the number.

Ok.

For example, if it is Paseo de la Bana One and the other is in Paseo de la Bana One, then one says Paseo de la Bana One and the other one sees.

And when you enter, you are already benefited, you enter the file and they take away your time.

Ok.

Ok.

It's been years with Google, huh? I don't know..

Looking for dirty tricks to be able to move forward.

OK.

Ok.

What else? No, certainly not..

By far.

Thank you.

Ok.

Nothing, man..

And here I am for what.

sea.

Now let's see if this has already been published,.

It was Mil Limón, Alcaladenares, it is not yet.

There are some photos, but not all of them..

They are not all.

That is, that.

will give.

Lately I have seen there on Facebook Google Thru, that.

There are some delays at times.

But so far, how? I the last two that.

I have uploaded, more uploaded perfect, or well, tomorrow I will see him, tomorrow is all that.
this.
